

The mineral collection

All the subtleties of grey.

Coloured greys, either warm or cool, depending on the light. The grain of the wood is just visible while the iridescent effects give a metallic or stone-like aspect.

Ideal for those shades of grey often found in the architectural landscape by giving a little hint of something both original and neutral.

WOOD STAIN

Light Mineral

METAL COLOUR STANDARD ASSOCIATION

Black 100 sanded

OPTIONAL METAL COLOUR

Grey 900 sanded

WOOD STAIN
